PROFESSIONAL SUMMARY

Full Stack Developer with experience building and supporting ERP systems, mobile applications, business automation, and AI/OCR document processing in manufacturing and trading environments. Skilled in C#, TypeScript, Python, Dart, SQL Server, ASP.NET Framework (Serenity), Laravel, Flutter, Node-RED, UiPath, and Ollama. Experienced in working with business users to turn manual processes into practical system solutions.

TECHNICAL SKILLS

Languages: C#, TypeScript, JavaScript, Python, PHP, Dart, SQL	**Frontend:** Vue.js, HTML5, CSS3, Tailwind CSS, HighCharts, Flowbite
Backend / ERP: ASP.NET Framework (Serenity), Laravel, REST API, ERP Workflow Development	**Database:** SQL Server, MySQL, SSMS, SSIS, ODBC, Stored Procedures, Views
Mobile: Flutter, Apple App Store & Google Play Store Deployment	**Automation / AI:** Node-RED, UiPath, Ollama, Workflow Automation, AI Document Processing
Tools / Infra: Git, GitHub, Jira, IIS, Windows Server, WordPress, AutoCount AP Integration	**CMS:** WordPress Website Management & Administration

PROFESSIONAL EXPERIENCE

TSH Manufacturing Solutions Sdn Bhd

June 2025 – Present

Full Stack Developer | C#, TypeScript, ASP.NET Framework / Serenity, SQL Server, Python, Flutter, Node-RED, UiPath, Ollama, SSIS, ODBC, AutoCount API

- Developed and supported the company's in-house ERP system, adding new features, fixing production issues, and improving workflows based on user and business requirements.
- Automated repetitive manual work using Node-RED, UiPath, and Python, helping teams save time and reduce day-to-day manual processing.
- Built AI/OCR document processing using Ollama and OCR tools to read Customer POs and other business documents, extract the required data, and create or update ERP records automatically.
- Built a lightweight ERP solution for a trading sub-company to move day-to-day business processes from manual work into a more structured system workflow.
- Designed, developed, and supported a Supplier Portal connected to the ERP system, where suppliers can view POs, submit ASN and invoices, and receive notifications for new POs.
- Developed APIs for integration between the in-house ERP system and AutoCount, allowing data to be exchanged between the two systems.
- Developed and maintained Flutter mobile applications, including deployment and release management for the Apple App Store and Google Play Store.
- Wrote and optimized SQL Server stored procedures, views, and queries used for ERP processing, reporting, dashboards, and automation.
- Worked on ERP data migration using SSIS and ODBC, with checks to keep data consistent and accurate between systems.

Digitalise Solution

March 2025 – May 2025

Full Stack Developer (Internship) | ASP.NET Framework (Serenity), TypeScript, SQL Server, HighCharts

- Worked on ERP dashboard improvements using HighCharts and TypeScript, and made usability improvements to the BOM module in Serenity.

Southern University College

May 2023 – December 2023

Full Stack Developer | Laravel, PHP, MySQL, Tailwind CSS, Filament, IIS, WordPress, GitHub

- Built the Laravel backend for the SUC Online Admission System, covering user login, programme applications, and student enrolment workflows used by multiple departments.
- Created admin dashboards with Filament v3 and responsive front-end pages using Laravel Blade, Tailwind CSS, and Flowbite.
- Used unit testing and GitHub to support code quality, version control, and team collaboration.
- Deployed and maintained the system on IIS / self-hosted Windows Server and prepared technical documentation, system diagrams, test cases, and bug records.
- Prepared user manuals and trained staff from different departments on how to use the system.
- Maintained and updated the university's WordPress website, including routine content and performance-related updates.
- Trained department administrators on managing WordPress website content.
- Supported the hardware team with troubleshooting and basic repair of laptops, desktops, and projectors.

Southern University College

October 2022 – January 2023

Programmer Intern | Laravel, PHP, MySQL, Tailwind CSS, Jira, GitHub

- Helped with frontend development and UI improvements for the SUC Online Admission System while working with the team through Jira and GitHub.

EDUCATION

Bachelor of Software Engineering	Southern University College	Mar 2023 – Apr 2025	**CGPA 3.66**
Diploma in Information Technology	Southern University College	Oct 2020 – Jan 2023	**CGPA 3.44**

CERTIFICATIONS & ACHIEVEMENTS

- Google Project Management Foundations — Coursera
- Mastering Laravel Framework and PHP — Board Infinity
- Introduction to Vue.js Framework — Coursera
- Silver Award — JIICaS 2024
- 3rd Prize — TechFest 2022
