DATA & INTEGRATION SQL Server, MySQL, Stored Procedures, Views, SSIS, ODBC, AutoCount API

AUTOMATION & AI Node-RED, UiPath, Ollama, OCR / Document Processing

OTHER TOOLS Flutter, App Store / Google Play deployment, Git, GitHub, Jira, IIS, Windows Server, WordPress

PROFESSIONAL EXPERIENCE

TSH Manufacturing Solutions Sdn Bhd

Jun 2025 – Present

Full Stack Developer | C#, TypeScript, Serenity, SQL Server, Python, Flutter, Node-RED, UiPath, Ollama

- Developed and maintained the company's in-house ERP system, adding new features, fixing production issues and improving workflows based on user requirements.
- Built automation workflows using Node-RED, UiPath and Python to submit invoices to customer portals, download customer POs and enter them into the ERP automatically, reducing repetitive manual work.
- Used Ollama and OCR tools to extract information from customer POs and other business documents, then create or update the related ERP records automatically.
- Built a lightweight ERP solution for a trading sub-company, bringing everyday operations into a more structured and connected workflow.
- Designed, developed and maintained an ERP-connected Supplier Portal where suppliers can view purchase orders, submit ASNs and invoices, and get notifications for new orders.
- Developed APIs to connect the ERP system with AutoCount, allowing users to maintain account number mappings in the ERP and adding error handling for integration issues.
- Developed and maintained Flutter mobile applications, including preparing and managing releases for the Apple App Store and Google Play Store.
- Wrote and optimized SQL Server stored procedures, views and queries for ERP workflows, reporting and dashboards.
- Built dashboards using Highcharts to visualize and analyze ERP data, helping users spot trends and review operational performance.
- Migrated ERP data using SSIS and ODBC, with validation checks to maintain data accuracy and consistency across systems.

EARLIER EXPERIENCE

Digitalise Solution Sdn Bhd
Mar 2025 – May 2025

Full Stack Developer (Internship) | Serenity, TypeScript, SQL Server, Highcharts

- Improved ERP dashboards using Highcharts and TypeScript, and updated BOM pages to make them easier for users to work with.

Southern University College
May 2023 – Dec 2023

Full Stack Developer | Laravel, PHP, MySQL, Tailwind CSS, Filament, IIS, WordPress

- Developed the Laravel backend for the Online Admission System, covering applicant accounts, applications and student enrolment.
- Built admin dashboards using Filament v3 and responsive pages with Blade, Tailwind CSS and Flowbite.
- Used unit testing and GitHub to check changes and support version control during development.
- Deployed and maintained the system on IIS / Windows Server, and documented the system design, test cases and deployment steps.
- Prepared user guides and trained staff from different departments on how to use the admission system.
- Maintained the college's WordPress website and helped department staff manage website content.

Southern University College
Oct 2022 – Jan 2023

Programmer Intern | Laravel, PHP, MySQL, Tailwind CSS, Jira, GitHub

- Supported front-end development and UI improvements for the Online Admission System, collaborating with the team using Jira and GitHub.
